

# SPRAY INSULATION

## Value Proposition

PLIXXENT Spray Insulation Materials are part of the most versatile construction material. Unlimited thickness and the ability to fill any given space or shape make polyurethane spray foam insulation an ideal solution for a wide array of construction applications. The foam creates a sealed envelope and protects any space, room or building from outside cold and heat influences.

## Features & Benefits

### Features

High insulation value

Excellent Durability

Light weight

Design freedom for shape and curve

Easy to apply

Air tight

### Benefits

Increased efficiency

Energy reduction

CO2 saving

Improved indoor comfort

Time saving

## Sub-Applications

- Storage tanks
- LNG tanks
- Building insulation
- Lifeboats
- Agriculture Sector
