

ROLLER SHUTTERS

Value Proposition

PLIXXENT Foam for Window Shutters offers an extensive product portfolio to cover market needs from standard production lines to special needs such as higher densities or different reaction profiles. As part of a sandwich structure, polyurethane provides the required rigidity and dimensional stability at minimum weight to reduce the thickness of the aluminum sheet which also reduces the environmental impact of the window shutter.

Features & Benefits

Features

Insulation value

Durability

Light weight

Benefits

Increased Efficiency

Optimal Processing

Flexible Processing

Low-cost Production

Sub-Applications

- Window Shutters
- Garage Doors
- Sun Shading
